

Testing for Life

A clean and safe environment is a prerequisite for health and quality of life.

Eurofins Environment Testing contributes to this by providing market-leading laboratory testing services to industry organisations, environmental consultants and government authorities across Australia.

■ Soil Testing

Polluted Sites
Building & Construction
Sediment & Sludge
Acid Sulfate Soil Assessment
PFAS

■ Water Testing

Drinking Water
Spring & Bottled Water
Waste Water
Surface Water
Leachate Analysis

■ Air Testing

Emissions
Soil Gas
Air Monitoring
Indoor Air Testing
Stack Emission Sampling

■ Microplastics

■ Asbestos
■ Mould
■ Microbiology
■ Field Services

Our Capabilities

We are a full-service environmental testing operation certified across Australia.

Our laboratories are accredited for the analysis of a wide range of samples;

- Emerging Contaminants including PFAS and 1,4-Dioxane
- Persistent Organic Pollutants including Dioxins/Dioxin-like PCBs/PBDEs
- Total Recoverable Hydrocarbons (TRHs)
- Semi-Volatile Organic Compounds (SVOCs)
- Volatile Organic Compounds (VOCs)
- Metals & Metalloids
- Physicochemical Testing (pH, Electrical Conductivity, Redox potential etc)
- Water Chemistry (BOD, COD, TOC, TSS, TDS, etc.)
- Microbiology
- Microplastics

Full time staff available 24/7 to accommodate projects of any size

Extensive courier system for expedited turnaround times

Large inventory of instrumentation with built-in redundancy

Dedicated Analytical Service Manager (ASM) appointed for each client

Ongoing method development and method optimisation

Servicing Australia Nationwide

Eurofins Environment Testing has laboratories located in Brisbane, Canberra, Geelong, Hobart, Melbourne, Newcastle, Perth and Sydney.

Our client service offices located in Adelaide, Darwin, Townsville and Wollongong, ensure convenient access to our services across Australia.

The Eurofins Environment Testing Australia network of NATA-accredited laboratories is conveniently located across Australia, enabling service and support to all regions.
