

Water Testing Capability Statement

Eurofins Environment Testing is a leading potable water laboratory in Australia. We provide an unparalleled range of testing and support services for drinking water compliance and monitoring, bottled water, water in food production and water for reuse.

PFAS in Drinking Water

- Treated Water
- Process Water
- Trade / Industrial Waste
- Wastewater / Effluent
- Source (fresh) Water
- Groundwater / Bore Water
- Drinking (Potable) Water
- Marine & Estuarine Waters
- Microplastics
- Leachates
- Irrigation Water
- Cooling Towers

Testing for Life

www.eurofins.com.au

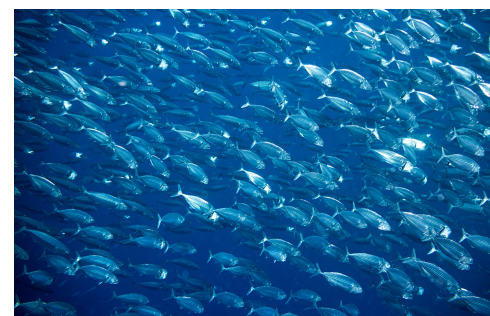

Today's environmental management issues rely on accurate analysis of water samples to ensure protection of this resource for future generations.

Water is the most important resource we have and it is vitally important for all of us. In many countries it is the object of numerous environmental laws and regulations. This relates not only to drinking water but ultimately for the whole water cycle, including surface and ground water, process and waste water.

Our Capabilities:

Within the Eurofins Environment Testing Australia network of companies, our laboratories are NATA accredited for the analysis of a wide range of water samples for:

- Emerging Contaminants including PFAS and 1.4-Dioxane
- Total Recoverable Hydrocarbons (TRH)
- Semi-Volatile Organic Compounds
- Volatile Organic Compounds
- Metals
- Inorganics and Aggregates
- Microbiology
- Persistent Organic Pollutants including Dioxins / Dioxin-like PCBs
- Microplastics
- Biological toxins
- Waterborne pathogens
- Disinfection by-products (DBPs) - NDMA, THMs

Global Leader – Results you can trust

Our laboratories are proudly accredited for a wide range of organic and inorganic chemistry analyses and microbiological testing

Scan to learn more about our Water Testing Capabilities

Full time staff available 24/7 to accommodate projects of any size

Extensive courier system for expedited turnaround times

Large inventory of instrumentation with built-in redundancy

Dedicated Analytical Service Manager (ASM) appointed for each client
