

Methods within the flexible scope of accreditation

The methods in this document belong to the flexible scope category II of the DAkkS accreditation with the number D-PL-19579-02-00 (Eurofins SOFIA GmbH). Eurofins SOFIA GmbH is permitted, without being required to inform and obtain prior approval from DAkkS, the following the modification, development and refinement of testing methods.

The flexibility of the accreditation area is only possible upon application and if competence in this area is proven. All test methods that are used by the laboratory with reference to an accreditation are verified or validated.

Matrix	Test type	Designation and version of the test procedure	Title test method
Food	GC/FPD	ASU L 00.00-34 2010-09	Analysis of foods - Modular Multiple analytical method for the determination of pesticide residues in foodstuff (extended and revised version of the DFG S19) - (Modification: module E9: Fractionation)
		LA-GCMS-109-02	Determination of phosphine in vegetable foods using headspace-GC/FPD
	GC-MS	ASU L 00.00-34 2010-09	Analysis of foods - Modular Multiple analytical method for the determination of pesticide residues in foodstuff (extended and revised version of the DFG S19) - (Modification: module E9: Fractionation)
		ASU L 00.00-49/2 1999-11	Analysis of foods - low-fat foods - Determination of dithiocarbamate and thiuram disulfide residues - part 2: gas chromatographic method (Modification: adsorption on SPME and measurement GC-MS, calibration with Thiram)
		LA-GCMS-014-01	Determination of dithiocarbamates in food using Headspace-SPME-GC/MS
		LA-GCMS-023-03	Total inorganic bromide in selected foods using GC / MS
		LA-GCMS-505-01	Sulfuryl fluoride using headspace-SPME-GC-MS in food
		LA-GCMS-536-01	Determination of methyl bromide in food using headspace-SPME-GC-MS
