

Our commitments and actions for a responsible economy

To create wealth and improve living conditions through healthy and sustainable production and consumption patterns, without harming the environment and human beings.

1. Implement a responsible economic policy

1.1 Promoting responsible economic development

Eurofins ADME BIOANALYSES has placed responsible economic development at the heart of its growth strategy in order to better promote it to its employees and partners.

In this context, management has set up a "Green Team", a group of volunteer employees responsible for proposing actions, raising awareness and uniting employees.

1.2 Developing an efficient and supportive economy

Eurofins ADME BIOANALYSES produces quality services that benefit the company by promoting the services of local companies.

1.3 Managing resources in an optimal way

Eurofins ADME BIOANALYSES promotes innovation by deploying new practices and tools to better manage its human and financial resources.

1.4 Encouraging alternative methods

Eurofins ADME BIOANALYSES supports the principles of a circular economy, in particular by recovering or recycling its waste (paper, cardboard, ink cartridges, batteries, etc.)

2. Enhancing the value of the territory

2.1 Promote local products and know-how

Eurofins ADME BIOANALYSES promotes collaborations and partnerships with local companies to support local products and know-how.
