RE: Laboratory Certification
Lab ID #42700

Dear Ms. Vratheva:

Enclosed is the new chemical certification for your drinking water laboratory.

The laboratory is certified to analyze drinking water samples for the chemicals and analyses methods listed on the certificate and accompanying analyte sheet. Analyses performed by analysts not approved by a primacy agency, or utilizing methods not listed on the certificate, will not be accepted for compliance.

The certification expiration date is **April 1, 2027**. Application for renewal should be made at least thirty days prior to the expiration date with the submittal of a completed application and the appropriate fee. The Department must be notified within 30 days of any change to your home state certification status, including expiration, revocation, or downgrade.

All results are to be reported to the Department by either XML or direct entry. Analytical results must be received by the Department no later than 10 days after the end of the compliance month. The Lab ID# is **42700** and must be included on all reports submitted to this office for compliance.

If there are any questions regarding this matter, contact me at (334) 271-7775 or bal@adem.alabama.gov.

Sincerely,

Benny A Laughlin
Compliance Assurance Section
Drinking Water Branch
